

DELTA^ΔMAXX[™]

by Imperial Systems, Inc.

upgrade replacement filters

The DeltaMAXX[™] Filter delivers the longest filter life, cleanest air and the greatest cost savings.

Imperial Systems, Inc. offers a complete line of DeltaMAXX[™] upgrade and custom designed dust collector bags to fit most manufacturer's baghouses.

- **Standard Dust Collector Filter Bags**
- **Shaker & Reverse Air Baghouse Bags**
- **Pulse Jet Bags**
- **Envelope and Custom Bags**

WELDED SEAM DeltaMAXX[™] UPGRADE REPLACEMENT FILTER BAGS

Imperial Systems, Inc. now offers **welded seam replacement filter bags**. Our welded seam bags are heat sealed, reducing the risk of fine particles leaking through the needle holes. The welded seam filter bags also eliminate the possibility of damage to the filter bag from abrasive dust which can tear apart the sewing thread at the seam. Our welded seam filter bags are produced by a more cost effective method than sewn seam filter bags, reducing the cost of the bag itself. Sewn seams are available.

Regardless of the nature of your dust collection and air pollution control application, Imperial Systems, Inc. has the answer for all of your cartridge filtration needs.

upgrade replacement filters

The DeltaMAXX™ Cartridge Filter delivers the longest filter life, cleanest air and the greatest cost savings.

Regardless of the nature of your dust collection and air pollution control application, Imperial Systems, Inc. has the answer for all of your cartridge filtration needs.

DELTA^ΔMAXX advantages

- Up to Twice the Filter Life
- Most Advanced NanoFiber Technology
 - MERV 15 Filtration Efficiency - best in the industry
 - Reduced Dust Collector Operational Costs
 - Lower Operational Mass Emissions
 - Less Pulse Cleaning
 - Surface Loading
 - Longest Filter Life
- Highest Quality Pleated Media
- 99.9% Efficiency .3 to .5 Micron

DeltaMAXX™ Upgrade Filters are manufactured for all makes and models of cartridge dust collectors

cartridge overbags

Cartridge Overbags are designed to prevent fibrous dust from bridging across the filters and getting stuck in the cartridge pleats. Using a Cartridge Overbag, in some applications, will extend the life of the cartridge filter. To prevent bridging, slip the cartridge overbag over the filter. The

Cartridge overbags are custom manufactured to fit your filter.

Specs

- Material is 100% nylon mesh
- Filtration 75 Micron
- Temperature - 212°
- Hem Material: 9 oz. Polyester Felt
- Constructed with bungee cord for adjustable fit
