

# SERVICE MAXX

USE THE DUST COLLECTION EXPERTS

# PREVENTATIVE MAINTENANCE

Dust Collectors made by Imperial Systems are designed to provide many years of air filtration and air pollution control. Cleaner air means a healthier workplace environment decreasing employee and production downtime.

Proper preventative maintenance on your Dust Collector will ensure the cleanest air possible and maximizing the life of the machine.

Our ServiceMAXX program will provide high quality, worry-free maintenance of your dust collection system. Our experts are OSHA trained and confined space certified. They will evaluate the equipment you have and tailor a regularly scheduled maintenance program to give you the best results all year long.

# SERVICE PROGRAM

- Visual inspection of internal components
- Airlock inspection if applicable
- Observe and verify proper machine operation
- Identify needed parts
- Recommend maintenance
- Identify components nearing the end of their life
- Calibration, tune-ups, and updates
- Visual inspection of duct
- Free telephone support

“

**Excellent service!” says Kelly W., Senior Manager of Environmental Relations, “We hired Imperial Systems’ service division to perform a quarterly preventative maintenance inspection. The service team was on time, courteous, professional, and respected the policies and procedures of the plant. The team was neat, cleaned up after themselves, wore the proper PPE, and kept communication with the site contact throughout the day. They even made some spot repairs on the unit as they found them (as opposed to noting issues in the report).”**

”

## FILTER SERVICE & TROUBLESHOOTING

- System Inspection
- Cartridge Filter Change-out
- Baghouse Filter Change-out
- Preventative Maintenance

- Camfil Farr
- AAF
- UAS
- MicroAir
- Airex
- Robovent
- Wheelabrator
- Pangborn

## INSPECTION

There’s a major advantage to having professionals do your filter changes for you. Our ServiceMAXX team doesn’t just change filters. They also inspect them, check for leaks or other problems, conduct dye testing, and make sure your system is working properly. Having the ServiceMAXX team change your filters means that if there is a problem, you’ve already got exactly the right people there to identify it and fix it.
